Since 2008 Owner-led Quote-ready

IT Relevant Technical Experience

Founder-led technical experience supporting government IT environments since 2008. This background helps translate requirements into accurate sourcing, dependable support, and practical delivery.

- Database management support for sensitive federal healthcare records and operational patient workflows.
- Clinical scheduling database builds used to manage appointments, workflow data, and patient-record context.
- Supported 500+ workstations plus peripherals, printers, phones, displays, televisions, and VTC equipment.
- Outfitted organizations with laptop refresh packages by gathering specs, comparing laptops, monitors, mice, keyboards, docks, and configurations, then recommending options adopted for government purchase and deployment.
- Enterprise IT administration using Active Directory, Group Policy, patching, staging, software deployment, backups, and user support.
- ATO readiness support, including system preparation, documentation, patching, and compliance-oriented follow-through.

Differentiators

- SI Since 2008 Government IT**
Hands-on support in secure federal operating environments.
- RE Records-Aware Healthcare Data**
Database experience around sensitive records and operational workflows.
- AT ATO Support Readiness**
System preparation, patching, documentation, and compliance support.
- OW Owner-Led Responsive**
Direct communication, clear scope, quote support, and follow-through.

CO Company Overview
